Anti-Legionella Boost

1. Hold the black **Holiday Button** under the digital display for around 10 seconds until the display goes blank. If the display does not go blank, you have an older model where the anti-legionella boost is not adjustable.
2. Release the **Holiday Button** and wait for 5 seconds.
3. Hold the **Holiday Button** and you will see the display come back on – **DO NOT RELEASE THE BUTTON YET.**
4. Keep holding the **Holiday Button** until you see **OF** appear on the digital display.
5. Release the **Holiday Button** and immediately press the **Holiday Button** again several times until you see **7** on the digital display. This will set your boost to come on once every week.
6. Wait until **7** is replaced by the cylinder water temperature on the digital display.
7. Hold the **Holiday Button** until the digital display goes blank.
8. Release the **Holiday Button** and wait for 5 seconds.
9. Press the **Holiday Button** until the digital display comes back on.

Anti-legionella boost should now be on and the red LED should be illuminated.

Disable Anti-Legionella Boost

1. Hold the **Holiday Button** under the digital display until the display goes blank.
2. Release the **Holiday Button** and wait for 5 seconds.
3. Hold the **Holiday Button** and you will see the display come back on – **DO NOT RELEASE THE BUTTON YET.**

4. Keep holding the **Holiday Button** until you see **7** appear on the digital display.
5. Release the **Holiday Button** and <u>immediately</u> press the **Holiday Button** again and you should see **OF** on the digital display.
6. Wait until **OF** is replaced by the cylinder water temperature on the digital display.
7. Hold the **Holiday Button** until the digital display goes blank.
8. Release the **Holiday Button** and wait for 5 seconds.
9. Press the **Holiday Button** until the digital display comes back on.

Anti-legionella boost should now be disabled.
