

Series 5 - Programming

1. Press the > button to wake up the display.
2. Hold the > button until you see TIME on the display.
3. Use the dial on the side of your thermostat to scroll up to PROG.
4. Press the > button.
5. At this point you can select one of the following by moving the dial up or down;
 - **24 Hr** – Every day's programs will be the same
 - **7Day** – Each day can be set individually
 - **5-2Day** – Monday to Friday programs will be the same and weekends can be a different program

For this example, we have selected 24 Hr programming.

6. Once you have selected from the above, press the > button and you will see P1. This is Program 1 and will normally be your first ON time.
7. Press the > button to get to the ON time and use the dial to select the time you would like your heating to come on.
8. Press the > button to get to the temperature and use the dial to select the temperature you would like P1 to achieve, (usually between 18c and 21c).
9. Press the > button, you should see P2. This will normally be the time you would like your heating to go off.
10. Press the > button to get to your OFF time and use the dial to select the time you would like your heating to go off.
11. Press the > button to get to your OFF temperature and use the dial to lower the temperature, (usually between 12c and 15c). This is known as a setback temperature.
12. Press the > button and you will see P3. This will be your second heating time.
13. Press the > button to get to the ON time and use the dial to select the time you would like your heating to come on.
14. Press the > button to get to the temperature and use the dial to select the temperature you would like P3 to achieve, (usually between 18c and 21c).
15. Press the > button, you should see P4. This will normally be the time you would like your heating to go off.

16. Press the > button to get to your OFF time and use the dial to select the time you would like your heating to go off.
17. Press the > button to get to your OFF temperature and use the dial to lower the temperature, (usually between 12c and 15c). This is your overnight setting so if you don't want your heating on overnight you will need to use a low temperature setting.
18. Press the > button and you will see P1 again.
19. If you have used 7Day or 5-2Day setting, press the < button until you get to the day or group of days that you have set and use the dial to advance onto the next day or group of days then follow the instructions above from step 6.
20. Press the < button repeatedly until you get back to the HOME screen.
21. Press the > button to select the CLOCK icon. This is AUTO mode.
