## PROGRAMMABLE ROOM THERMOSTAT

### What is a Programmable Room Thermostat?

A Programmable Room Thermostat combines a timer and thermostat in one unit by allowing you to set your desired comfort temperature at different times during the day. The ES RTP6C can operate as a 7-day, 5/2-day or 24-hour Programmable Room Thermostat with either 4 or 6 time and temperature events per day.

The ES RTP6C also includes energy saving Optimum Start technology as well as the safety feature of Landlord Service. These options can be turned on or off depending on user preference.
