
ESWIFIHUB

Installation Instructions

Plug your ESWIFIHUB into a power supply using the USB cable provided.

Connecting to a thermostat/programmer via RF

1. Hold the right button until the left button flashes. Your ESWIFIHUB is in RF Pairing Mode.
2. Ensure your thermostat or programmer is also in pairing mode. Your ESWIFIHUB & thermostat/programmer will pair automatically.

ESWIFIHUB

Connecting to Wi-Fi

1. On your smartphone or tablet, download the ESi Centro app and create an account.
2. On your ESWIFIHUB, hold the left button until the right button is flashing. Your ESWIFIHUB is now in WI-FI pairing mode.
3. On your Centro app, log in and at the bottom of the screen you will see 'Add a new device' click this and follow the onscreen instructions.

Factory Reset

1. Hold both buttons on your ESWIFIHUB together.
2. While holding both buttons, power off your ESWIFIHUB, then power it back on again.
3. Keep holding both buttons, when you see the red & green lights flash alternately, your ESWIFIHUB will no longer be connected to your Wi-Fi network, RF thermostat or programmer.
