

ESRTP6B-W

# Stratus

Our **WIFI programmable controls** provide your customer with a truly Smart room thermostat. Not only is it controllable via our simple-to-use **Centro app** or **Amazon Alexa**, but our range offers energy saving features, which help your customer take control of rising energy prices.

**NOW WITH BATTERY POWER FOR TOTAL CONVENIENCE AND MOBILITY.**

**2 channel control**

**WiFi out the box**

**OpenTherm technology**

**No hub required**

Follow us:

The OpenTherm technology improves communication between the control and heating system, safely and efficiently modulating flow temperature to minimise gas use by up to **15%**.

The optimum start/stop function controls when the heating is turned on or off based on the current room temperature, reducing the warmup time and energy usage even further, making **ESi the truly Smart choice.**

Download the app and take control of your heating system.

# Features & benefits

Features	Benefits
OpenTherm connectivity	Can save up to 15% energy use when connected to an OpenTherm compatible boiler
Control through thermostat or via app	Easy and simple to use
Optimum start/stop	Providing cost savings
